Globalization

Globalization refers to increasing global connectivity ،integration and interdependence in the economic, social, technological ،cultural, political, and ecological spheres. Globalization is an umbrella term and is perhaps best understood as a unitary process inclusive of many sub-processes (such as enhanced economic interdependence, increased cultural influence, rapid advances of information technology, and novel governance and geopolitical challenges) that are increasingly binding people and the biosphere more tightly into one global system. There are several definitions and all usually mention the increasing connectivity of economies and ways of life across the world.

Working woman

Nowadays it is important for women to work outside the home because of economic reasons. Yet, this idea is still debated by many people who argue that the family, especially small children may be neglected. I believe that every woman has the right to work, but she should carefully consider many problems. Especially, when the she is at work, she may concern and worry about her children. She may wonder if they are safe, and if her absence is hurting them emotionally. After a mother takes into consideration all these problems above, she must decide if a job outside home is worth it. I believe that in spite of all these obstacles, many mothers work and manage a family successfully.

Young people

Old people are more annoying by far. They are so quick to degrade and stereotype younger people even though every group has had their criminals and bad apples. They are rude and think they can say or do anything to anyone without the other person having any recourse. I have been victimized numerous times by older people and all old people can do is keep degrading us . So I chose Young people because that has a no one can touch me attitude, demo and think they know everything.

Humor

I think that the best things to relief from stress is to watch some sitcoms or hear something funny like jokes …person should develop his sense of humor and he should be cool, Comic and optimistic ،because some expert of mental .health have noted that we can't imagine going through a day without laughter. Humor will make every part of your life better. It will help you trough difficult times and it will help you make the good times even letter, also i twill attract good people and good situations to you.

Brain Drain

One of the most serious issues in the world today is the brain drain phenomenon. Thousands of intellectuals leave their native country in search for a better life. There are many factors that breed this situation. First, the lack of job opportunities is one of them. Moreover, the host country offers better work conditions and ensures a comfortable life for these new comers. This "Capital flight" as many people call it has both positive and negative effects. It not only helps these brainy people to improve their standards of living but it also enables them to contribute to the development of their home country when they come back. One way to prevent this is to offer to these people tempting salaries and opportunities to ameliorate their potentials inside their home country.

Technology

Advanced technology has transformed our lives completely both physically and morally. Every day people are assaulted by new gadgets on markets. As a result, life is becoming more and more comfortable but complicated as well. Unemployment is spreading because machines are taking man's place. Armed conflicts break out here and there due to free arm trade. More and more refugees abandon their home land in search of peaceful shelter. Technology is something good as long as it serves humanity. However, when it makes a mistake, the price to pay is very high: human lives!

Citizenship

is membership in a society, community ،city or town but now usually a country and carries with it to political participation; a person having such membership is a citizen. Citizenship status often implies some responsibilities and duties. It is largely coterminous with nationality although it is possible to have a nationality without being a citizen legally subject to a state and entitled to its protection without having rights of political participation in it); it is also possible to have political rights without being a national of a state. In most nations, a non-citizen is a non-national and called either a foreigner or an alien Citizenship.

Sustainable Development

Sustainable development is a pattern of resource use that aims to meet human needs while preserving the natural environment so that these needs can be met not only in the present, but in the indefinite future .The term was used by the Brundtland Commission which coined what has become the most often-quoted definition of sustainable development as development that "meets the needs of the present without compromising the ability of future generations to meet their own needs ". The field of sustainable development can be conceptually broken into three constituent parts :environmental sustainability ، economic sustainability and social - political sustainability.

International Organization

International Organization is a leading peer-reviewed journal that covers the entire field of international affairs. Subject areas include: foreign policies, international relations, international and comparative political economy, security policies, environmental disputes and resolutions, European integration, alliance patterns and war, bargaining and conflict resolution, economic development and adjustment, and international capital movement. Published on behalf of the International Organization Foundation.
