Exemples de writing English BAC

Cultural values

Groups, societies, or cultures have values that are largely shared by their members. The values identify those objects, conditions or characteristics that members of the society consider important; that is, valuable. In the United States, for example, values might include material comfort, wealth, competition, individualism or religiosity. The values of a society can often be identified by noting which people receive honor or respect. In the US, for example, professional athletes are more highly honored than college professors, in part because the society values physical activity and competitiveness more than mental activity and education.

Young people

Old people are more annoying by far. They are so quick to degrade and stereotype younger people even though every group has had their criminals and bad apples. They are rude and think they can say or do anything to anyone without the other person having any recourse. I have been victimized numerous times by older people and all old people can do is keep degrading us. So I chose Young people because that has a no one can touch me attitude, demo and think they know everything.

Science and technologies

The distinction between science and technology is not always clear. Science is the reasoned investigation or study of phenomena, aimed at discovering enduring principles among elements of the phenomenal world by employing formal techniques such as the scientific method. Technologies are not usually exclusively products of science, because they have to satisfy requirements such as utility, usability and safety. Technology is often a consequence of science and engineering —although technology as a human activity precedes the two fields. For example, science might study the flow of electrons in electrical conductors, by using already-existing tools and knowledge. This new-found knowledge may then be used by engineers to create new tools and machines, such as semiconductors, computers, and other forms of advanced technology. In this sense, scientists and engineers may both be considered technologists; the three fields are often considered as one for the purposes of research and reference .

Human rights

The concept of human rights has existed under several names in European thought for many centuries, at least since the time of King John of England. After the king violated a number of ancient laws and customs by which England had been governed, his subjects forced him to sign the Magna Cart, or Great Charter, which enumerates a number of what later came to be thought of as human rights.

Right of women

Madarisy.com : مصدر هدا الملف هو موقع مدارسي

Nowadays we take it for granted that women have the same rights as men before the First World War few people believed this . As far as work was concerned there were jobs wish were regarded as women's jobs and other which were regarded as men's jobs. Women's jobs were generally lower paid as men's. Men did almost all the heavy jobs in industry or in transport . Women had jobs like dress-making, cleaning or worked as servants . Women's main role was as being to raise children and look for their home. Women were not expected to take position of leaders chip.

Women's role in development

Women's participation in development has vital benefits. In the case of morocco, this participation takes place at there main levels: the social this political and the economic. First, we can't ignore the active contribution of women in our society as nurses, teachers or mothers and wives. As nurses. women give help to patients in hospitals. as teachers ,they teach the young generation and the illiterate. as mothers and wives, they bring up kids tube good citizens. Second, there are many women who take leading position in the government with a desire to encourage democracy, and establish freedom and equal rights at the components of our society.

Citizenship
is membership in a society, community, city or town but now usually a country and carries with it to political participation; a person having such membership is a citizen. Citizenship status often implies some responsibilities and duties. It is largely coterminous with nationality although it is possible to have a nationality without being a citizen legally subject to a state and entitled to its protection without having rights of political participation in it); it is also possible to have political rights without being a national of a state. In most nations, a non-citizen is a non-national and called either a foreigner or an alien Citizenship ,

International organization

International Organization is a leading peer-reviewed journal that covers the entire field of international affairs. Subject areas include: foreign policies, international relations, international and comparative political economy, security policies, environmental disputes and resolutions, European integration, alliance patterns and war, bargaining and conflict resolution, economic development and adjustment, and international capital movements. Published on behalf of the International Organization Foundation.

Drop out of school
Increasing stress in school, at work, and at home has caused many students to drop out of school to escape their problems. With this increasing amount of stress and work, some students have become very frustrated and depressed. Students then drop out of school and take the easy way out to eliminate some of that stress .

Brain drain

The migration of skilled individuals from developing countries has typically been considered to be costly for the sending country, due to lost investments in education, high fiscal costs and

labor market distortions. Economic theory, however, raises the possibility of a beneficial brain drain primarily through improved incentives to acquire human capital. Our survey of empirical and theoretical work shows under what circumstances a developing country can benefit from skilled migration. It argues that the sect oral aspects of migration and screening of migrants in the receiving country are of major importance in determining the welfare implications of the brain drain. These issues, as well as the size of the sending country, duration of migration and the effect of Diaspora populations, should be addressed in future empirical work on skilled migration. Brain drain » is the phenomena whereby nations lose skilled labor because there are better paid jobs elsewhere. In recent years , this has affected poorer countries more so, as some rich countries tempt workers away, and workers look to escape bleak situations in their poor home countries.

Sustainable development

Sustainable development is a pattern of resource use that aims to meet human needs while preserving the natural environment so that these needs can be met not only in the present, but in the indefinite future. The term was used by the Brandt and Commission which coined what has become the most often-quoted definition of sustainable development as development that « meets the needs of the present without compromising the ability of future generations to meet their own needs. » The field of sustainable development can be conceptually broken into three constituent parts: environmental sustainability, economic sustainability and social .

Humor

I think that the best things to relief from stress is to watch some sitcoms or hear something funny like jokes ..person should develop his sense of humor and he should be cool , Comic and optimistic, because some expert of mental .health have noted that we can't imagine going through a day without laughter. Humor will make every part of your life better. It will help you trough difficult times and it will help you make the good times even letter, also i twill attract good people and good situations to you .
